

DOMESTIC CCTV SYSTEMS

Are you one of the many people having property damaged or stolen? Have you thought about the cost of CCTV?

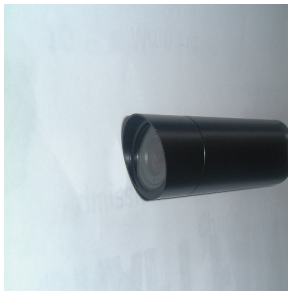

A CCTV system allows you to view your property 24/7 365 days a year.

With an ever increasing crime rate wouldn't you like to know who's at your front door, to be able to see them or talk to them before you open the door?

Then maybe we can help you make this possible. Using small covert cameras to provide discreet surveillance or a more prominent camera to give a distinctive visual deterrent we can ensure you can keep a very close eye on your property.

Also we can install audio equipment to most cameras to provide sound as well as pictures.

We can also install remote control for your main door to allow you to not only see who is at your door but to allow you to unlock it for them from the comfort of your armchair.

We can even set your system to operate on sensor activity, when something is seen by your sensors the video will begin to record.

As well as outdoor cameras there are a wide range of indoor cameras for your baby's room to monitor them while you're in another room, with audible capabilities, or covert cameras that look like smoke detectors, clocks & alarm sensors. We can install cameras as small as a fifty pence piece to protect not only your home but your business as well.

You can request a no obligation site visit from us by filling in the attached enquiry form on this site or simply telephoning us on the numbers provided on the contact page.
